

## Parental Monitoring Apps

### Qustodio

Qustodio

- This app can block access to inappropriate websites
- Parents can block specific apps or games
- Can 'safesearch' meaning it will filter out any inappropriate websites if something is typed into Google
- Limit screen time
- Location tracking which can also send alerts when a child arrives or leaves
- Sends you a report of what your child has searched for online, app usage and YouTube monitoring

### Kidslox

- This can block apps
- GPS tracker so you can check where your child is
- An instant lock function so your child's phone can be locked from your phone
- Screen time limits
- It shows which apps your child is on the most
- Web filter which allows you to stop your child accessing certain website

### Kidlogger

- This is FREE
- Tracks what your child types and which websites they visit
- Keeps a record of which programs/apps your child uses
- Tracks any screengrabs/screen shots your child takes
- There is a voice-activated sound recorder
- If your child is older and more responsible, you can pick and choose which options to monitor

## Kaspersky

- This monitors social networks
- Shows which social media your child goes on e.g. Snapchat, Instagram
- Offers location tracking when your child isn't at home
- Can read text messages that your child has sent

## mSpy

- Can keep a track of all the messages your child receives
- Can also monitor social media platforms like Facebook, Instagram and Snapchat.
- Get to see photos/videos exchanged as well as messaging
- GPS tracker so you can check a where your child is
- You can also set a 'zone' that your child has to stay within and will alert you if they leave that area

## EyeZy

- Gives you access to all the messages on your child's phone (inc the deleted ones)
- View messages that have disappeared or been deleted (eg on Snapchat)
- Can screen record when your child is on certain apps like Snapchat (this means it will take a screenshot of everything your child does on Snapchat)
- GPS tracker so you can check a where your child is

## uMobix

- This is one of the best spy apps for checking an iPhone
- It can show you deleted messages, calls and contacts
- You will get a notification when a call or message has been deleted
- It shows you if a contact has been 'renamed'
- From the uMobix app on your phone you can also:
  - Delete unwanted apps on their phone
  - Block websites, Wi-Fi, or a certain device
  - Disable messages & restrict calls.
